Contents of *Ecological Modelling*, Vol. 83

VOL. 83 NOS. 1–2 1 DECEMBER 1995

Special Issue

Modelling Water, Carbon and Nutrient Cycles in Forests

Proceedings of a workshop held in Leusden, The Netherlands, 10–14 May 1993

Acknowledgements viii

Workshop on Comparison of Forest–Soil–Atmosphere Models: Preface
H.J.M. Van Grinsven (Bilthoven, Netherlands), C.T. Driscoll (Syracuse, NY, USA) and A. Tiktak (Bilthoven, Netherlands) 1

The Solling Norway Spruce site
M. Bredemeier (Göttingen, Germany), A. Tiktak and K. Van Heerden (Bilthoven, Netherlands) 7

The Solling dataset. Site characteristics, monitoring data and deposition scenarios
A. Tiktak (Bilthoven, Netherlands), M. Bredemeier (Göttingen, Germany) and K. Van Heerden (Bilthoven, Netherlands) 17

Review of sixteen forest–soil–atmosphere models
A. Tiktak and H.J.M. Van Grinsven (Bilthoven, Netherlands) 35

Calibration of process-oriented models
P.H.M. Janssen and P.S.C. Heuberger (Bilthoven, Netherlands) 55

Soil water dynamics of the Solling spruce stand, calculated with the FORHYD simulation package
W. Bouten (Amsterdam, Netherlands) 67

Application of the MAGIC model to the Norway spruce stand at Solling, Germany
R.C. Ferrier (Aberdeen, UK), R.F. Wright (Oslo, Norway), B.J. Cosby (Charlottesville, VA, USA) and A. Jenkins (Wallingford, UK) 77

Application of the SAFE model to the Solling spruce site
C. Jönsson, P. Warfvinge and H. Sverdrup (Lund, Sweden) 85

Application of the model NUCSAM to the Solling spruce site
B.-J. Groenenberg, H. Kros, C. Van der Salm and W. De Vries (Wageningen, Netherlands) 97

Modelling Al-solubility controls in an acid forest soil, Solling, Germany
L.G. Wesselink and J. Mulder (Wageningen, Netherlands) 109

Modelling seasonal nitrogen, carbon, water and heat dynamics of the Solling spruce stand
H. Eckersten, A. Gärdenäs and P.-E. Jansson (Uppsala, Sweden) 119

Application of the model NICCCE to the Solling spruce site
D. Van Dam (Wageningen, Netherlands) 131

The application of the model NAP to the Solling spruce site
H. Van Oene and G.I. Ågren (Uppsala, Sweden) 139

Application of the model FIWALD to the Solling spruce site
P. Schall (Freising, Germany) 151

Application of PnET-CN/CHESS to a spruce stand in Solling, Germany
K.M. Postek, C.T. Driscoll (Syracuse, NY, USA), J.D. Aber (Durham, UK) and R.C. Santore (Syracuse, NY, USA) 163
Forest growth in relation to site conditions. Application of the model FORGRO to the Solling spruce site
G.M.J. Mohren and J.R. Van de Veen (Wageningen, Netherlands) 173
Simulation of forest stress for the Solling spruce site with SOILVEG
K. Van Heerden, H.J.M. Van Grinsven and A. Tiktak (Bilthoven, Netherlands) 185
Application of the FORSOL model to the spruce site at Solling, Germany
J.G. Van Minnen, R. Meijers and L.C. Braat (Bilthoven, Netherlands) 197
The forest modelling series ForM-S: applications to the Solling spruce site
T. Oja, X. Yin and P.A. Arp (Fredericton, Canada) 207
Application of the model FORSUM to the Solling spruce site
N. Kräuchi (Birmensdorf, Switzerland) 219
A model relating forest growth to ecosystem-scale budgets of energy and nutrients
M. Hauhs, A. Kastner-Maresch (Bayreuth, Germany) and K. Rost-Siebert (Leonberg-Höfingen, Germany) . 229
Water balance of the Solling spruce stand as simulated with various forest–soil–atmosphere models
W. Bouten (Amsterdam, Netherlands) and P.-E. Jansson (Uppsala, Sweden) 245
Evaluation of model behaviour with respect to the biogeochemistry at the Solling spruce site
H. Kros (Wageningen, Netherlands) and P. Warfvinge (Lund, Sweden) 255
Modelling effects of soil acidification on tree growth and nutrient status
G.M.J. Mohren (Wageningen, Netherlands) and H. Ilvesniemi (Helsinki, Finland) 263
Effects of stresses on forest growth in models applied to the Solling spruce site
K. Van Heerden and R.D. Yanai (Bilthoven, Netherlands) 273
Modelling critical loads for the Solling spruce site
W. De Vries (Wageningen, Netherlands), M. Posch (Helsinki, Finland), T. Oja (Tartu, Estonia), H. Van Oene (Uppsala, Sweden), H. Kros (Wageningen, Netherlands), P. Warfvinge (Lund, Sweden) and P.A. Arp (Fredericton, Canada) 283

VOL. 83 NO. 3 15 DECEMBER 1995

Transmission of Japanese Encephalitis in a 3-population model
P.K. Tapaswi, A.K. Ghosh (Calcutta, India) and B.B. Mukhopadhyay (Burdwan, India) 295
Simulated diffusion dynamics in river networks
A.R. Johnson, C.A. Hatfield and B.T. Milne (Albuquerque, NM, USA) 311
FAGUS, a model for growth and development of beech
F. Hoffmann (Kiel, Germany) 327
Equilibrium analysis of a decomposition and yield model applied to *Pinus radiata* plantations on sites of contrasting fertility
D.A. King (Kensington, N.S.W., Australia) 349
A three-dimensional stochastic model of the behavior of radionuclides in forests. I. Model structure
M.T. Berg (Morgantown, WV, USA) and L.J. Shuman (Pittsburgh, PA, USA) 359
A three-dimensional stochastic model of the behavior of radionuclides in forests. II. Cs-137 behavior in forest soils
M.T. Berg (Morgantown, WV, USA) and L.J. Shuman (Pittsburgh, PA, USA) 373
A three-dimensional stochastic model of the behavior of radionuclides in forests. III. Cs-137 uptake and release by vegetation
M.T. Berg (Morgantown, WV, USA) and L.J. Shuman (Pittsburgh, PA, USA) 387
